

**The World's First Blockchain-Based
Adult Entertainment Platform**

Today's online adult entertainment system is riddled with issues

Adult Content Consumers

Users face a constant fear of their payment details and personal information being stolen.

After users register, they receive spam and run the risk of getting scammed.

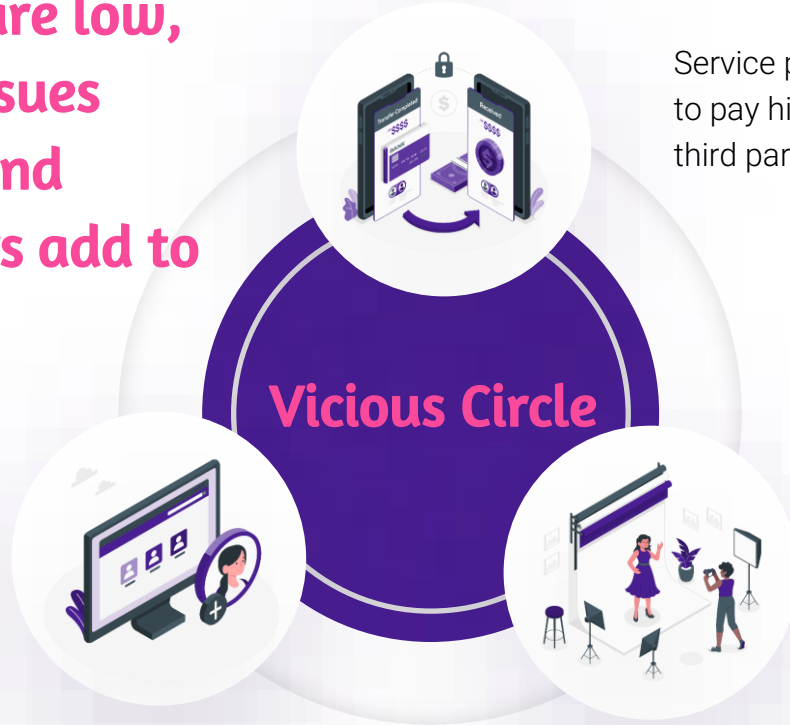

Existing services, apps, and games are outdated, and suffer from low-quality, and a lack of innovation.

Most video chat and gambling platforms have poor rewards for models and sub-standard coverage.

Centralized databases make users easy targets for hackers.

Profit margins are low,
and payment issues
for merchants and
service providers add to
the woes.

Service providers have
to pay high fees to
third parties.

Merchants have to choose
either to charge high prices
or to compromise on quality.

The models working in
the industry are left
frustrated with payment
concerns, reducing the
quality of their output.

Say hello to Topsy

Topsy is an entertainment platform, an end-to-end ecosystem, and a payment system that massively improves payment security and the user experience in the world of adult services such as video chat, gambling, dating, media, and more.

Topsy App Store

An open-source platform

where developers can create and deploy apps, merchants can sell goods, and models can upload and share media and offer services such as video chat.

Topsy Ecosystem

Links native apps with third-party apps and external businesses. Sustains itself via one single TIPSY payment token. Has Infinity AI at its heart, controlling diverse functions.

Topsy Payment System

A new and better kind of payment system based on multiple blockchains that helps merchants, service providers, and customers earn profits and work in a safe environment.

The All-in-One Platform for Adult Services, Products, Apps, and Games

Topsy gives back the power to performers, their fans, and the adult service providers.
